UX Training Highlights

User Experience Research and Design Specialization

University of Michigan

It consists of six modules taught by university professors, covering over 80 hours of classes and 19 graded assignments. I learned how to assess user needs, conduct interviews and usability tests, analyse analytics and statistics, to name a few.

User Experience (UX): The Ultimate Guide to Usability and UX

David Travis

This course provided me with the fundamentals of UX theory. It focused on how to analyse user research, create red routes, sketch paper prototypes, and moderate usability tests.

DESIGN RULES: Principles + Practices for Great UI Design

Joe Natoli

I learned about design principles, such as alignment, proximity, contrast, balance. The most significant concept from the course was the principle of progressive disclosure.

Usability Testing Boot Camp

David Travis

This course focused on how to conduct a thorough usability test. It included real-life examples of usability tests. It was based on psychology and involved useful insights into the human mind, for example, post-rationalising and inability to accurately predict the future.

Master Digital Product Design: UX Research & UI Design

Rob Sutcliffe

Thanks to this course, I engaged in creativity boosting exercises, out-of-the-box thinking and critical thinking. I adopted the attitude of constantly doubting my assumptions and checking their credibility.

Experience

English Teacher

2017-2019

I was an English teacher in Poland and England. Working closely in a team of English teachers allowed me to refine my interpersonal skills. I was awarded the Employee of the Month title at Barnwell Middle School.

Education

Masters, Jagiellonian University, Kraków

2015 - 2017

Subject: English, Grade: Bardzo Dobry (UK equivalent: Distinction)
